

European Broker Meeting™

THE EUROPEAN BROKER MEETING 2011

Berlin, capital city and the largest of Germany, is the perfect place for the European Broker Meeting 2011 and the most ambitious event in terms of attendees for the Computer Trading Industry. This year we aim to bring over 350 attendees and promote the largest networking get-together for brokers, wholesalers, computer traders and manufacturers in the world.

The European Broker Meeting is an opportunity to meet all the greatest players in our industry in one place at the same time. With the objective of encouraging the safe trading, strong business relationships and personal contact, this networking event offers a series of activities and venues for leisure which promote the exchange between representatives of Member companies of www.TheBrokerSite.com: Europe's Largest B2B Computer Trading Exchange. Computer traders are able to meet with their customers and suppliers; and make new business contacts at the same time. The European Broker Meeting also offers the ability for traders to put a face to the company or business that they are already trading with.

www.TheBrokerSite.com has been organizing the European Broker Meeting since 2005 in cities like Paris, Amsterdam and Prague, going to a different city each meeting. This will be the 7th meeting and it is the first time (of surely many) to open its registration to a larger audience. 350 representatives are welcome to join us at the InterContinental Berlin.

SOCIALLY RESPONSIBLE

As part of a long-lasting new tradition to support a Charity through The European Broker Meeting's social responsibility program, we have chosen to support Action Duchenne. For every attendee registration made after September 1st we will donate 100 Euro to Action Duchenne. Next to that we will dedicate Thursday night's Gala Dinner to accumulate as many funds as possible!

100% of the funds raised for Action Duchenne through this year's European Broker Meeting will go to fund "Pilot Trials Now", funding clinical trials of existing drugs that show promise in the treatment of Duchenne. For the first time in the history of Duchenne, ground-breaking new therapies are being developed that show realistic hope and promise to thousands of kids world-wide living with this heartbreaking condition.

DUCHENNE ALLIANCE
